

# SleepRight

## NO-BOIL DENTAL GUARD

### DESIGNED TO PROTECT TEETH & TMJ FROM CLENCHING AND GRINDING

- NO BOILING REQUIRED - FITS ALL SIZES
- COMFORTABLE & DURABLE
- SAFE & EASY

#### HERE'S HOW IT WORKS!

The SleepRight's adjustable bitepads are made of a resilient material that fits comfortably between the teeth and are designed to re-establish the natural freeway space. While the SleepRight protects teeth from clenching and grinding, we strongly encourage patients to concentrate on "lips together, teeth apart" to initiate the muscle relaxation process.

The SleepRight does not require boiling water. Detailed pictures are included with easy to follow care and fitting instructions. With the SleepRight's patented adjustable technology, there are four bitepad positions, making it easy to customize the size and fit backward for a larger fit, as well as swivel to match the angle of all bites.

The SleepRight utilizes natural tissue retention between the lips, cheek and tongue to be held in place. The flexible, heat sensitive band is positioned between the lower lip, teeth and gums and uses body temperature to quickly adapt to each individual's anatomy.

#### SELF-ADJUST TECHNOLOGY

#### Slim-Comfort

- Preferred for daytime wear.
- Ideal for small mouths and sensitive gums.

#### Secure-Comfort

- Identical to the Slim-comfort, except it features stability wings for extra security

#### Dura-Comfort

- More durable bitepads.
- Stability wings are recommended for nighttime wear.
- Band is anatomically designed for comfort.

- ✓ Ready to use - Patients benefit immediately
- ✓ No impressions - No lab fees
- ✓ Less chair time
- ✓ FDA cleared, CE certified and BDHF approved.
- ✓ Does not contain latex or Bisphenol A (BPA)
- ✓ Durable, stable and comfortable
